

The Architectural Heritage Fund (AHF) helps communities find enterprising ways to revitalise the old buildings they love. Our funding support charities and social enterprises in developing sustainable new uses for historic buildings that are redundant or under-used. We aim to both enable the conservation of historic buildings and also to help groups own and manage historic buildings for the long-term. We do this by providing *grants* for early-stage project development; and *loans* at any stage. This guidance gives further information on our **grants**.

The development work that we fund enables groups to test out ideas for re-using a building and to prepare detailed plans to the point of being ready to commence the works. In Wales, projects may be located anywhere – in cities, towns or rural areas.

This guidance is designed to help you decide if our support is right for you – please read the guidance in full. We try to be as flexible as possible in managing our grant-giving and are always happy to discuss projects and offer advice at any stage.

If you think your project is eligible and fits with our funding priorities, or you would like further advice, ***please complete the [online enquiry form](#) and one of our Support Officers will get in touch.***

In general, your project will be eligible if all of the following apply:

- your project involves an historic building, which we define as:
 - Listed - Category I, II*, or II
 - unlisted but in a Conservation Area, and/or
 - highly valued by the local community for its historic interest;
- your project involves a change of primary use and/or a change of ownership;
- your project is being led by a not-for-private-profit organisation

Things we cannot fund:

- work that has started before a decision to award a grant
- repair costs that are not part of a larger scheme to find a new sustainable use
- ongoing maintenance costs

Please read on for further details on eligibility and what we look for in assessing applications.

Which of our grants could be right for you?

Stage you have reached	Grant scheme	Decision cycle
<p>Just Starting Out</p> <p>You may be thinking about forming an organisation or have recently constituted, or be a long standing organisation tackling a new project. You have identified a building or buildings - either already in your ownership or one you are considering taking ownership of. You may have some ideas about how the building could be restored and used, but are wanting to explore the options and test whether these will work.</p>	<p>Project Viability Grant</p> <p>Up to £10,000</p>	<p>Monthly</p>
<p>Ready to Move Forward</p> <p>You have already completed the feasibility and viability work needed, but you need to do more detailed work to develop your plans and help secure capital funding to deliver your project.</p>	<p>Project Development Grant</p> <p>Up to £10,000</p> <p>Up to £20,000</p>	<p>Monthly</p> <p>Quarterly</p>
<p>Ready to Restore Your Building</p> <p>Your plans will be close to being fully developed and some of your delivery capital funding may already be in place, but there is still a funding gap you need to fill. Or you need to complete emergency work to arrest further deterioration to the historic fabric. Or work is required to test 'meanwhile' use(s).</p>	<p>Capital Work Grant</p> <p>Up to £50,000</p>	<p>Once a year</p>

In considering which grant best fits the stage you have reached in building design terms, you may find it helpful to refer to the Royal Institute of British Architect's Plan of Work. This may help you in discussing your requirements with your architect and professional team and developing briefs for their work. A summary guide to the RIBA stages can be found [here](#) and the relevant Plan stages are noted in the tables below.

AHF grants in Wales are supported thanks to funds from [Cadw](#), [Garfield Weston Foundation](#) and [The Pilgrim Trust](#).

The Pilgrim Trust

Who can apply

Your organisation must be one of the following not-for-private-profit organisations, or lowest tiers of local government

Unincorporated organisations (e.g. charitable trusts and associations) intending to incorporate (for Project Viability Grants only)

Charitable Incorporated Organisation (CIOs)

Charitable Company Limited by Guarantee

Charitable Community Benefit Societies

Community Benefit Societies

Not-for-private-profit companies Limited by Guarantee

Community Interest Companies (CICs) Limited by Guarantee

Co-operatives

Community and Town Councils

We will not fund

Private individuals

Local authorities or other public sector bodies (unless applying on behalf of an organisation still in formation)

Universities, colleges and other mainstream educational institutions, including independent schools

For profit companies, unless in a partnership led by a not-for-profit organisation

Unincorporated organisations (e.g. charitable trusts and associations) that are not intending to incorporate

Organisations with less than three Trustees or Directors (if there are only three Trustees / Directors) none of these should be spouses or otherwise related to each other

Limited liability partnerships

Churches or other places of worship, where the building will remain in use primarily as a place of religious worship – defined as hosting more than six religious services per year

How we assess your application

Potential for positive social and environmental change

A change of use and/or change of ownership is proposed, or you have recently acquired the building. With a new use or by being brought into community ownership, the building and your vision for it must have the potential to increase the vitality of the place – increasing footfall, extending the hours when social and economic activity is taking place, creating a new offer for residents or visitors. We want to see that projects have potential to deliver both economic and social outcomes, using or from a heritage asset. This can include job and business creation, plus floor space brought back into use. Social potential can include an increase in volunteering, people developing new skills, increased pride of place, and improved wellbeing. We prioritise projects that demonstrate the potential to have positive impact in disadvantaged areas, such as urban communities experiencing structural economic decline, or isolated rural communities experiencing poor access to services. We look for evidence of strong community involvement and support in the project. We also look for you to have thought about the potential environmental impact of your project – what do you want to achieve and how?

Ownership & Organisational Capacity

Your organisation should own, or be intending to acquire, or hold a long lease on, the building. Your lease (existing or proposed) should have at least 25 years left to run following project completion. In exceptional cases and where meanwhile uses are planned in preparing a longer term proposal, we may be able to consider projects with a shorter lease: if you are in this position then you need to discuss this with us before applying. We will consider your organisation's ability to deliver; for example, have you any staff; what is the background and experience of your Trustees?

Heritage value

Your building should be of special architectural or historic interest and your proposals should be heritage-led. It will be nationally listed Category I, II* or II or, if it is unlisted, will be considered for support if a convincing case can be made for their heritage value to local people. If located within a conservation area you will need to show that the building makes a positive contribution to the character and appearance of the conservation area. We give priority to buildings that are 'at risk' and look for evidence of this such as being listed on Cadw's Buildings at Risk Register, or some explanation as to the nature of the threat, which could be economic or physical.

Financial need

We prioritise applications that can show wider financial support in the form of some match funding. Match funding demonstrates wider commitment to your project and a willingness to share in some of the risk. Local community fundraising can help generate community awareness and support. Match funding requirements differ across the grants - see below. We can only accept in kind/pro bono contributions as match funding in exceptional circumstances. We will expect you to explain why you need grant funds from us, as opposed to other sources of fundraising.

Why now?

We look to understand how our funding would help you move the project forward. It may be that our funding would help achieve a project milestone such as acquiring a building, creating a business plan, developing detailed designs, submitting a funding bid. We look to understand why the funding is necessary now and what difference it will make. If there are any time constraints, such as match funding deadlines or other restrictions, please make these clear in your application.

Project Viability Grants

You can apply for a maximum of £10,000. The average offer is £5,000.

We can fund up to 100% of the cost of work involved.

What is this for? *Equivalent to RIBA Plan of Work stage 0 – 2*

To explore the different options for re-use, or to test and cost a single option.

This typically involves an initial assessment of the building's condition and repair needs, outline design solutions sympathetic to its heritage value that can accommodate the uses under consideration, and the outline cost of the works needed to repair and convert the building. It will also involve considering the outline business case for the possible uses, based on research and consultation, and how the project could be funded. In many cases, it may be necessary to obtain an independent property valuation, for example if the funding strategy may include Social Investment (loan finance) or to identify the conservation deficit, which is where the cost of the project will exceed the value of the restored building.

Points to note

We can fund up to 100% of the cost of work involved, although the overall package of work required will often be more than we can afford to pay ourselves. In that case, we *prefer but do not require* to see some evidence of match funds having been secured or sought: you do not have to have secured any match funding to be able to apply. Match funds means that you would contribute to some of the costs from your own resources and/or funds raised from other sources. For example, costs of £10,000 could mean you apply to AHF for £5,000 and apply to other sources for £5,000. You would set this out in the application form.

If in doubt, please discuss with the relevant Support Officer in advance of your application.

If you do not already own the building, you will need to provide evidence that you have a reasonable prospect of securing ownership, for example, a letter from the owner giving you preferred bidder status, or that they have agreed to allow you time to raise the necessary funds.

You should generally be already constituted as one of the organisational types listed above, but if part of your work is to explore the best type to set up as, we will accept applications in advance of formally registering your group. As a minimum, we will want to see that you have an initial governing structure, constitution and organisation bank account.

We prefer applications to be based on an actual quote rather than an estimate. If any item of work for which you are seeking funds is over £10,000, you must obtain at least three competitive quotes. *Please get in touch with a Support Officer if you need assistance with this.*

What will this grant help you achieve?

At the end of the funded work, you should be in a position to decide whether to commit to further cost, risk and effort in developing the project and be able to provide a route map for the next steps. We ask you to use our Project Viability Appraisal template to bring together the results if any professional reports and studies with your own knowledge of the area and potential project. This will also be a document you can then present to potential funders and supporters to help explain your plans.

Project Development Grants

You can apply for a maximum of £20,000. The average offer is £9,200.

We can fund up to 100% of the cost of work involved.

What is this for? *Equivalent to RIBA Plan of Work stages 2 - 4*

To enable you to take forward the development of your capital project to the next stage.

This could include developing the technical and design details, additional support to build the capacity of your organisation by employing or contracting a project manager, refining your business plan, building community engagement and preparing funding bids. Within the maximum above, this could be more than one grant over time, enabling you to move forward in stages.

Points to note

Applications for up to £10,000 are assessed in shorter timescale. It is possible to apply more than once, for successive stages of work, up to a maximum of £30,000 per project. One piece of work must normally be completed before another started.

We can fund up to 100% of the cost of work involved, although the overall package of work required will often be more than we can afford to pay ourselves. In that case, *we prefer but do not require* to see some evidence of match funds having been secured or sought: you do not have to have secured any match funding to be able to apply. Match funds means that you would contribute to some of the costs from your own resources and/or funds raised from other sources. For example, costs of £40,000 could mean that you apply to AHF for £20,000 and apply to other sources for £20,000. You would set this out in the application form.

If you do not already own the building, you will need to provide evidence that you have a formal agreement to acquire it, such as Heads of Terms, which the owner cannot rescind without good cause.

You should be set up formally, as one of the organisational types listed above.

We require applications to be based on an actual quote rather than an estimate. If any item of work for which you are seeking funds is over £10,000, you must obtain at least three competitive quotes. *Please get in touch with a Support Officer if you need assistance with this.*

If you have not completed a Project Viability Appraisal funded by us, you will need to provide details of the work you have done to test the viability of your plans – this could include an Options Appraisal, business plan or other documents. We will consider how likely it is that your project will be able to go on to attract the capital funding required.

You will need to show that the proposals will be sympathetic to and not harm the historic character of the building. We want to know that there is no reason in principle why planning permission and listed building consent would not be granted. This will need to be backed by evidence that you have taken appropriate advice, including from conservation-accredited professionals.

What will this grant help you achieve?

At the end of the funded work, or series of grants if more than one, you would be expected to reach the stage of securing capital funding to enable the delivery of your project.

What viability and development work can be funded?

You may already have undertaken or commissioned some of this work at the point you contact us, but still have some gaps to fill in. Or you may be starting from the beginning in looking at possible options. Our funding can help you to complete the picture or to move forward. **We cannot fund any work that has started or costs you have incurred before we issue a grant offer letter.**

Any work that is essential for taking the project forward towards to goal of revitalising an historic building will be considered. Applicants must explain how a particular piece of work or activity will enable this.

Examples include:

- Employment of a project co-ordinator (either someone appointed externally on a consultancy basis or an existing employee(s) working **additional** hours on this specific project).
- Fees for consultants needed to help progress plans (e.g. architect, quantity surveyor, structural engineer, mechanical and electrical engineer).
- Property valuation by a RICS registered valuer.
- Fundraising consultants.
- Business planning consultants.
- Costs associated with developing a bid to the National Lottery Heritage Fund or other capital funders (e.g. Activity Plan, Training Plan, Conservation management Plan).
- Costs of community engagement work (e.g. outreach, pop-up events, consultations).
- Legal costs where this is critical in establishing ownership or the viability of proposed uses (e.g. advice on restricted covenants) or for advice on governance (e.g. to determine the appropriate constitutional model for delivering the project and operating the building following completion).
- Specialist VAT advice to identify the most tax efficient approach to the project.
- VAT costs that cannot be reclaimed.
- Organisational overheads/administration costs.
- First year's membership to the Heritage Trust Network (<https://www.heritagetrustnetwork.org.uk>)
- Costs associated with converting an existing charity or social enterprise into a Community Benefit Society.
- In addition, we recommend joining the **Fit for the Future** network to support your positive environmental impact. The cost of the first year's membership (£150 for most organisations) can be claimed as an eligible cost as part of this grant. Find out more at www.fft.org.uk/join

Capital Work Grants

You can apply for a maximum of £50,000. The average offer is £34,800.

This can be up to 100% of the works but for larger schemes we will expect the match funding to be in place, or at an advanced stage of being secured.

What is this for? *Equivalent to RIBA Plan of Work stages 4 - 5*

The grant can fund the cost of repair, restoration and conservation work and associated fees. It can also fund emergency works and works required to test 'meanwhile' use(s), including services and fit-out.

Points to note

Your project will need to have the clear potential to deliver alternative uses and/or ownership structures and investment models to facilitate long-term regeneration of the building.

We can fund up to 100% of the cost of work involved, although the overall package of work required will often be more than we can afford to pay ourselves. In that case, we *prefer but do not require* to see some evidence of match funds having been secured or sought: you do not have to have secured any match funding to be able to apply. Match funds means that you would contribute to some of the costs from your own resources and/or funds raised from other sources. For example, costs of £150,000 could mean that you apply to AHF for £50,000 and apply to other sources for £100,000. You would set this out in the application form.

We require applications to be based on an actual quote rather than an estimate. You must obtain at least three competitive quotes as the works will likely be over the £10,000 threshold. *Please get in touch with a Support Officer if you need assistance with this.*

If you have not completed a Project Viability Appraisal or project development work funded by us, you will need to provide details of the work you have done to show the project's viability and long-term sustainability – this could include a business plan and other documents.

You will need to show that the proposals will be sympathetic to and not harm the historic character of the building. If planning permission and listed building consent is not already in place then, at the very least, the applications will have been submitted. You will need to inform us of the decision timeframe in your application to us. This will need to be backed by evidence that you have taken appropriate advice, including from conservation-accredited professionals.

What will this grant help you achieve?

If you're applying for a grant to complete emergency works, the building will be consolidated and further deterioration will be arrested.

At the end of the funded work, the building will be in usable state of repair, either for the long-term uses as identified in your business plan or for temporary 'meanwhile' uses while the fundraising is on-going for a larger scale phase of capital works.

How to apply

Firstly, please complete the [online enquiry form](#).

One of our Support Officers will then get in touch to discuss your project.

We will assist you in developing a draft application, offline.

You will then need to complete the online application form on the [Grants in Wales](#) section of our website; there you will find the Application Help Notes (PDF) to guide you in completing the form.

Please also refer to the application deadlines in the [Deadlines and Eligibility](#) section of our website.

When you submit your formal application, you will automatically receive an electronic copy of your submission. Shortly afterwards, we will confirm receipt and let you know the expected decision meeting date the application will be considered at.

When we review your application, if there is any additional information we require or anything that is unclear, we will get in touch with you to find out more.

If your application is unsuccessful, we will provide feedback as to why, and give guidance on whether another application would be worthwhile.

What happens when a grant has been awarded?

You will receive a formal offer letter which includes terms and conditions. You will then need to confirm that you accept these before you start the funded work.

We provide additional guidance to grantholders, but key points to note at this stage are:

Our grants are normally valid for one year. Where work is not completed within the time limit on the grant we may withdraw the funding, unless we have agreed to a request from you to extend the time limit.

You will need to make regular, informal progress reports during the work. Following completion, we may ask you to provide updates for up to 5 years, so that we can understand the outcomes our funding has helped you achieve.

We will ask you to publicise our support for your project, as a condition of the grant.

Grant payments are made in arrears, once work has completed: you will need to submit an online claim form and upload copies of invoices and evidence of work completed.

If required, we are able to pay in stages; we will discuss and arrange this with you.

We generally expect you to have claimed your grant in full before applying for any others for the same project, unless you have agreed otherwise with us in advance.

You will need to plan how you will cover your costs until the grant can be claimed.

For more information on claiming your grant, see www.ahfund.org.uk/granholders
